DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1-6 are rejected under 35 U.S.C. 102(b) as being anticipated by *Paradiso et al.* (A compact, Self-Powered Pushbutton Controller. September 2001, pages 299-304, labeled A1-A6).

As per claim 1, *Paradiso et al.* disclosed an identification transmission system (figure 1) comprising an antenna/transmitter circuit (figure 1/item RF transmitter. Hence it is clear that the RF transmitter module included an antenna (although not shown) in order to broadcast the identification code) configured to broadcast a predetermined tone on a predetermined carrier frequency through the antenna, and a piezo-electric power source (figure 1/item Piezo Element) electrically coupled to the transmitter circuit and configured to at least briefly provide power to the transmitter circuit, wherein the piezo-electric power source having a piezo-electric element, a striker (page A2/last paragraph-page A3/first paragraph) configured to move so as to at least briefly strike the piezo-electric element, a storage capacitor (page A2/last paragraph-page A3/first paragraph) configured to receive and store electrical charge from the piezo-electric

element, and voltage controlled switch (page A2/last paragraph-page A3/first paragraph) configured to allow the storage capacitor to discharge through the transmitter circuit thereby providing power thereto after a predetermined amount of charge has been stored.

As per claim 2, *Paradiso et al.* disclosed the claimed limitation (figure 1-3, page A2-A6).

As per claim 3, *Paradiso et al.* disclosed the claimed limitation (figure 1-3, page A2-A6).

As per claim 4, *Paradiso et al.* disclosed the claimed limitation (figure 1-3, page A2-A6).

As per claim 5, *Paradiso et al.* disclosed the claimed limitation (figure 1-3, page A2-A6).

As per claim 6, *Paradiso et al.* disclosed the claimed limitation (figure 1/item HT12E, page A2-A6).

Claim Rejections - 35 USC § 103

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Art Unit: 2685

4. Claims 7-8 are rejected under 35 U.S.C. 103(a) as being unpatentable over *Paradiso et al.* (A compact, Self-Powered Pushbutton Controller. September 2001, pages 299-304, labeled A1-A6) and in view of *Todd et al.* (5,065,067)

As per claim 7, *Paradiso et al.* disclose such piezo-electric striker interfaces but does not explicitly suggest such toy device having a striker that is coupled to a wheel and is actuated by the rotation of the wheel. However, such is well known in the art as disclosed by *Todd et al.* (figure 4-5, col. 4/ln. 8-19). Therefore, it would have been obvious to one of ordinary skill in the art to provide such piezo-electric striker interfaces, as suggested by *Todd et al.*, to the Self-Powered apparatus of *Paradiso et al.* in order to provide a toy such that the device can be easily self-power when pushed.

As per claim 8, the combination of *Paradiso et al.* and *Todd et al.* disclosed the claim limitation (see *Todd et al.*, figure 4-5, col. 4/ln. 8-19).

Conclusion

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
